avatarwise.com Review

The Scam Detector website Validator gives [avatarwise.com](#) a medium trust score on the platform: **60.1**. It signals that the business can best be defined by the following tags: **Active. Medium-Risk.** We are confident about our score as we also partner with other high-tech, fraud-prevention companies that found the same issues. So, why this low score? We came up with the **60.1** score based on 53 aggregated factors relevant to [avatarwise.com](#)'s industry. The algorithm detected high-risk activity related to phishing, spamming, and other factors noted in the **Active. Medium-Risk.** tags above. Long story short, we still see some red flags with this website. But let's explain in more detail.

Explaining Our Analytical Approach

We've displayed some important information within the Company Details section above, each deserving more explanation:

- Proximity to Suspicious Websites
- Threat Profile
- Phishing Profile
- Malware Score
- Spam Score
- Domain Blacklist Status
- HTTPS connection
- Domain Creation Date

While some are self-explanatory concerning [avatarwise.com](#), let's dive deeper into the remaining ones.

Proximity to Potentially Harmful Websites

This metric gauges the connection, scored on a scale of 1 to 100, between [avatarwise.com](#) and websites marked as suspicious. Elevated scores point to a stronger link with these questionable online destinations. It's worth noting that website owners might not always be aware of their site's proximity to these dubious platforms or servers. However, a "Proximity to Suspicious Websites" score surpassing 80 strongly indicates a high-risk website, while a score below 30 signifies a less-threatening site.

Risk Factors: Threat, Phishing, Malware, and Spam

These indicators reveal the vulnerabilities and elements embedded within the HTML code of [avatarwise.com](#). They become especially pertinent if the website has received reports from internet users who've encountered unsolicited emails, ads, or messages related to the site. In the context of [avatarwise.com](#), our investigation continues working to pinpoint the specific category, but we welcome your insights in the comments below. A high Malware score generally implies the presence of suspicious code that might be unknowingly disseminated. Conversely, a high Spam score hints at a possibly spam-ridden email address associated with the business. Scores under 30 in both categories are reassuring, but any score surpassing this threshold should raise concerns. **avatarwise.com is a problematic website, given all the risk factors and data numbers analyzed in this in-depth review. Share your experience in the comments.**

Domain Blacklisting Status

This term indicates whether [avatarwise.com](#) has landed on any online directories' blacklists and earned a suspicious tag.

Assessing HTTPS Connectivity

This section provides insight into whether [avatarwise.com](#) boasts an 's' at the end of the 'HTTP' protocol listed in your browser's address bar. If the tab displays in green, consider it a positive sign.

Safe Check

We want our trust scores and reviews to be as accurate as possible so that you can protect yourself from online fraud. Our algorithm aggregates factors that efficiently analyze a company's website, in this case, [avatarwise.com](#).

How To Remove Your Information From the Internet

Whether you like it or not, unfortunately, the Internet has all your personal information stored. How did that happen? Every time you visit a simple site and accept cookies, consent to their forms, or download an app, unscrupulous data brokers collect not just your phone number, name, AND address. They also sell this to third parties, which creates a \$1 billion industry a year. Your collected personal data is used by buyers to send you never-ending spam emails, targeted ads, and, of course, telemarketing calls. Crooks use all your data without remorse.

We can help. Many people have asked us about [how to remove your personal information from the Internet](#). If you want your data deleted entirely from the online world, contact our official partners at [Incogni](#) immediately. This legitimate data privacy tool works on your behalf to officially require a ton of online brokers to remove your data.

Our staff verifies that this service works and is trustworthy. For robust, essential protection, their Standard plan is a steal at just \$8.29 for individuals, and you can extend that crucial peace of mind to your entire household with the Family plan (up to 5 users) for only \$16.49. They also introduced the Unlimited plan starting from \$14.99 that covers not only automatic data removals, but also unlimited custom removals available right away upon purchasing the Unlimited plan. It allows users to submit websites not yet covered by Incogni and get their data removed from there, too. They also offer a free exposure scanner that will give you an insight into what data of yours is exposed and where.

How To Protect Your Online Browsing From Installing Malware

We have two more powerful fraud prevention tools that you should know about. We've been asked over and over again about the most effective ways to stay safe online. After testing several fraud prevention products online, we could certainly say the winner is a browser extension called [Guardio](#). It automatically blocks 100x more harmful websites than competitors and 10x more malicious downloads than any other security tool. It was tested and vetted by our Scam Detector team.

Guardio has over a million users, and while it is already affordable for the benefits it provides (just a few dollars a month), it covers up to 5 family members. For Scam Detector readers exclusively, Guardio offers a 20% discount this week. You can protect your online browsing from installing malware forever by clicking the button below:

How To Stop Third Parties From Tracking Your Devices

The second most powerful fraud prevention tool you should consider is [Surfshark](#). Here is why you should get it now, as the first 5 months are free:

1. They have an award-winning VPN service, protecting your privacy and preventing third parties from tracking your device.
2. They will notify you when your personal info is leaked online so you can delete your private data from the Internet immediately.
3. Surfshark has a super powerful antivirus program. It offers you effective protection from viruses and zero-day threats, a lightweight, clean, and easy-to-use app, and a 30-day money-back guarantee.
4. Check this: They hide your online searches, which means you will get only organic search results without tracking and follow-up ads. For example, when you search for a flight, and the next time you look at the same search, the prices are higher. With Surfshark, this doesn't happen.

For the Black Friday promotion, Surfshark offers 86% off + up to 5 months free to Scam Detector readers. You can get the deal only this week [HERE](#) or by clicking the button below.

Are You the Owner of [avatarwise.com](#)?

If you own [avatarwise.com](#), we'd love to hear from you. If you'd like to challenge the trust score we've assigned, we're happy to take a closer look. However, please be prepared to provide solid proof of your business's legitimacy. **Introduce yourself with your name (not just "Admin")**.

When domain owners contact us to dispute their trust score, we kindly ask for the following:

- * Business documentation that verifies your legitimacy (e.g., certificate of incorporation, business registration, or official records with the site or business name).
- * Your personal LinkedIn profile and the business's social media accounts (e.g., Facebook).
- * If available, proof of satisfied customers (e.g., screenshots, not just testimonials on your website), evidence of inventory, or records of handling order cancellations properly.

We're more than willing to update your review based on the evidence you provide—the more proof, the higher your trust score. Please note, however, that we cannot verify non-operational websites or those redirected to other URLs. Additionally, we do not verify websites involved in high-risk financial services, gambling, adult content, or illegal activities.

Avatarwise is a scam. I waited almost 2 months for my order. When I inquired they said that the was delivered 4 days prior to my email. They said to check with the post office. I have a secured mailbox. There was no way that I could have missed it. Don\'t buy here!

I ordered a 250 Birthday American flag. It was suppose to be made in the USA. Got a call from my credit card fraud department. They stated that the company was located in Hong Kong. I had them cancel the order. Advise: check out websites before you place any online order.
